# FISH

HERE'S THE CATCH

## CATCH A STATE RECORD

On February 4, 2013, Phil Colyar of Wenatchee caught a 35-pound, 10-ounce state record lake trout in Lake Chelan. The previous official state record mackinaw was also caught in Lake Chelan — a 35-pound, 7-ounce fish in 2001.

## YEAR-ROUND FISHING

The Lake Chelan Valley is known for world-class fishing. Our lake even boasts state records! It's common to hook fish ranging from six to twelve pounds, but there are much bigger ones to catch in our waters as well!

Fishing isn't limited to just Lake Chelan either. With five additional area lakes just miles from one another, there is no shortage of options for everyone from the novice to the most seasoned of anglers. Here you'll find a bounty of rainbow trout, kokanee, largemouth bass, and catfish, to name a few.

*Explore these waters and discover why the Lake Chelan Valley has made a name for itself as a premier fishing destination.*

# HISTORY

EXPLORE THE PAST

## **GEOLOGIC BEGINNINGS**

Lake Chelan was carved out of rock by glacial ice nearly 17,000 years ago. It is made up of two basins which are divided by a shallow sill known as the “Narrows.” The deepest of the two, The Lucerne Basin, holds 92% of the lake’s water in the northern three-quarters, and 5% of the water is below sea level. This basin is also home to one of the deepest lake gorges in the world. The walls of the lake around Safety Harbor Creek and Canoe Creek plunge over a thousand feet to a depth of 386 feet below sea level. Wapato Basin, the smaller of the two, is only 400 feet deep and 12 miles long. This is where the majority of the summer recreation takes place, with lake temperatures reaching 78 degrees in August.

## **THE MINERS**

In the 1880’s, the lure of precious metals brought prospectors to the upper regions of Lake Chelan. Miners began to trickle into the Stehekin Valley on an old Indian trail over Cascade Pass and on other routes from the Skagit River Mining district on the western slopes of the Cascades. Stehekin became a busy lake port for mining supplies, which were ferried up lake from Chelan. At the peak of the rush in the late 1890’s, hundreds of prospectors were searching for ore in the mountains above the valley. About 25 miles up-valley from Stehekin, the Black Warrior, Blue Devil, and Upper Horseshoe Basin mines showed the greatest promise for production.

## FIRST SETTLERS

Lake Chelan's first white settlers were William Sanders and William Domke. They arrived at the south end of the lake the hard way, from the north, in 1886. They crossed the mountains from the Methow Valley and found the steep shoreline impassable. After losing their horse to a fatal fall, they carved a cedar log into a crude canoe and made their way 50 miles to the south end of the lake.

## A LOOK AT OUR PAST

Native Americans most likely inhabited the lower Chelan Valley for thousands of years prior to its "discovery" by pioneer trappers, explorers, and prospectors in the 1800's. The Native Americans derived their names from the world in which they lived, thus the Native Americans in the Chelan Valley were called the "Tsill-ane," later spelled Chelan. To them, this meant "deep notch." The first white explorers who ventured into the Chelan area were Alexander Ross of the Pacific Fur Company and David Thompson of the rival Northwest Company. Both were on wide-ranging explorations to become familiar with the terrain and establish strategic fur trading centers for commerce with the Native Americans.

The area went largely unnoticed, except by a few hardy prospectors, until much later in the century. While on a reconnaissance trip for the U.S. Army in 1880, Lt. Thomas Symons saw Lake Chelan and proclaimed it "the most grandly beautiful lake I have ever seen." On his recommendation, the army established Camp

Chelan the following year, but due to difficult access, it was relocated to Spokane after only one year in service. With the influx of miners in the 1890's, Chelan began to grow, and homesteaders moved in. It did not take long for the first fruit orchards to be established after the potential for irrigation was realized.

## THE CAMPBELL HOUSE

Arriving from Iowa in 1889, C. C. Campbell purchased the property that is presently Campbell's Resort for \$400. In 1901, when the town of Chelan was nothing more than a village on the outlet shores of Lake Chelan, he borrowed \$5,000 to build a hotel.

An immediate success, the hotel was situated at a commanding site. Rooms were rented for 50 cents and dinner was another 50 cents. In those pioneer days, when freight wagons were pulled by four or six-horse teams, the hotel was a stopping place for teamsters and drivers. During those early days, cattle were driven across the river at the point where a concrete bridge now spans the Chelan River. At the Chelan Falls Landing, Columbia River steamboats docked, passengers transferred to the local stagecoach, and were transported into the town of Chelan. Many people remained overnight at the Campbell Hotel and then traveled up lake by steamer to the head of Lake Chelan where further fine hotels awaited these early day travelers.

# RELOCATING

A NEW ADVENTURE

## THE LAKE CHELAN VALLEY

Located in the heart of Washington State, the Lake Chelan Valley offers a world of natural beauty and outdoor adventures. With its pristine glacial waters stretching over 50 miles, surrounded by rolling vineyards and embraced by the North Cascades, this region is a haven for water sports enthusiasts, hikers and wine lovers alike. Explore charming towns like Chelan and Manson, where local hospitality mingles seamlessly with stunning landscapes. From sun-drenched shores to snow-capped peaks, the Lake Chelan Valley promises year-round enchantment for all who seek its embrace.

## CLIMATE

Lake Chelan's arid climate and limited rainfall make it a sought-after year-round destination for all. With over 300 days of sunshine annually and four distinct seasons, the valley offers a diverse playground for adventure. Surprisingly, despite its desert climate, the region thrives agriculturally, owing its success in irrigation from Lake Chelan and the Columbia River. This unique blend of climate and ingenuity creates a landscape where outdoor adventures and fertile fields harmoniously coexist, making Lake Chelan a truly exceptional destination.

## ANNUAL PRECIPITATION

**Chelan & Manson:** 12 in.

**Holden:** 250 in.

## AVERAGE LAKE TEMPERATURE

**Summer:** 60.5°  
**Winter:** 40°

## LAKE CHELAN WATER LEVELS

Whether it's for fishing, swimming, boating, or leisurely strolls along the waterfront, the lake stands as a cherished community hub. Beyond its recreational allure, Lake Chelan plays a crucial role in the Chelan County PUD's network of hydroelectric resources.

The Chelan County PUD meticulously manages the lake's water levels, maintaining them within a range of 1,084 to 1,100 feet above sea level. A fascinating seasonal rhythm unfolds as the lake's elevation drops by 20 feet each fall and winter, creating space from the influx of autumn precipitation and the spring runoff from the mountain snowpack.

This natural ebb and flow not only sustains the lake's ecosystem but also ensures a reliable source of hydroelectric power for the region. Lake Chelan's significance extends far beyond its scenic beauty, making it an integral part of Chelan County's sustainable energy infrastructure.

Although apples are the largest crop in the valley, cherries, pears, apricots, peaches, and wine grapes are also produced.
